Caloundra Hospital Emergency Department	Paediatric Advanced Life Support	\$6,000	Supported	Caloundra's emergency department see and treat approximately 25% of paediatric presentations each year. Staff are required to be able to provide advanced life support to children. Therefore participation in specific education related to children is vital. The Paediatric Life Support course is a one day course offered by the QLD branch of Advanced Paediatric Life Support. It is suited to junior hospital based doctors and nursing staff. Over the years the appeal has funded the training of over 160 places at this course.	Approved for Wish List	
Nambour Hospital's Operating Room Suite	iSTAT point of analyser acquisition	\$11,000	Supported	The i-STAT tests for Neonates (arterial and venous samples of cord bloods taken at every birth on the OR suite, caesarean sections and vaginal deliveries), cardiac, respirator and metabolic compromised patients, acute haemorrhage and TURP syndrome). No maintenance is required and it is simple and extremely convenient. Currently it is installed in ICU and pathology. However when staff are needed to go to these areas- it takes away man power at often critical times after hours including weekends, where human resources are already limited.	Approved by Board for Give Me 5 wish list - with a demonstration on how equip works If needed during GM5	
Nambour Hospital's Speech Pathology	Paediatric Speech Pathology Research Development	\$3,000	Supported	CD rom that can be used across paed Speech Pathology departments ensuring that all home programs are updated.	Approved

<i>Waterfall Road Clinics Courtyard</i>	<i>Courtyard Upgrade/Child Focused waiting area</i>	\$25,085		<i>The waiting area can be used by clients attending the Paediatric Private Practice Clinic, Diabetes Centre and Sunshine Kids (Child Protection Lisason Unit). It will provide a safe environment with the provision of appropriate and child friendly activities. The average client flow per month attending these services is 185.</i>		No
Maternity Ward	Support for Training of new lactation Consultations	\$6,480		lactation consultants educate and assist maternity staff to improve the skills necessary for helping women to successfully breastfeed. This will enable widwives in their education of mothers. Increased breastfeed rates provide long term cost benefits to the health system		
Emergency Department Nambour Hospital	Biers Block Machine for Paediatrics	\$18,483		Currently there is an ageing single cuff machine and best practise requires a double cuff. This means the patient will not be in as much pain. The department is in need of a new machine to meet the needs of a growing paediatric population. It will decrease th need to send a child into surgery and decrease the length of stay of the patient.
